	Group A	Group B
Secondary & primary school	20	
Ripples Int. rescue Centre	10	-
Autism Centre	-	5
Dyslexia	-	5
Hearing Impaired	-	10
Total	50 participants	

# ICT TOOLS/OTHER TOOLS

Digital literacy class- E-readers and tablet training

E-resource centre

Wi- Fi internet

Toys services

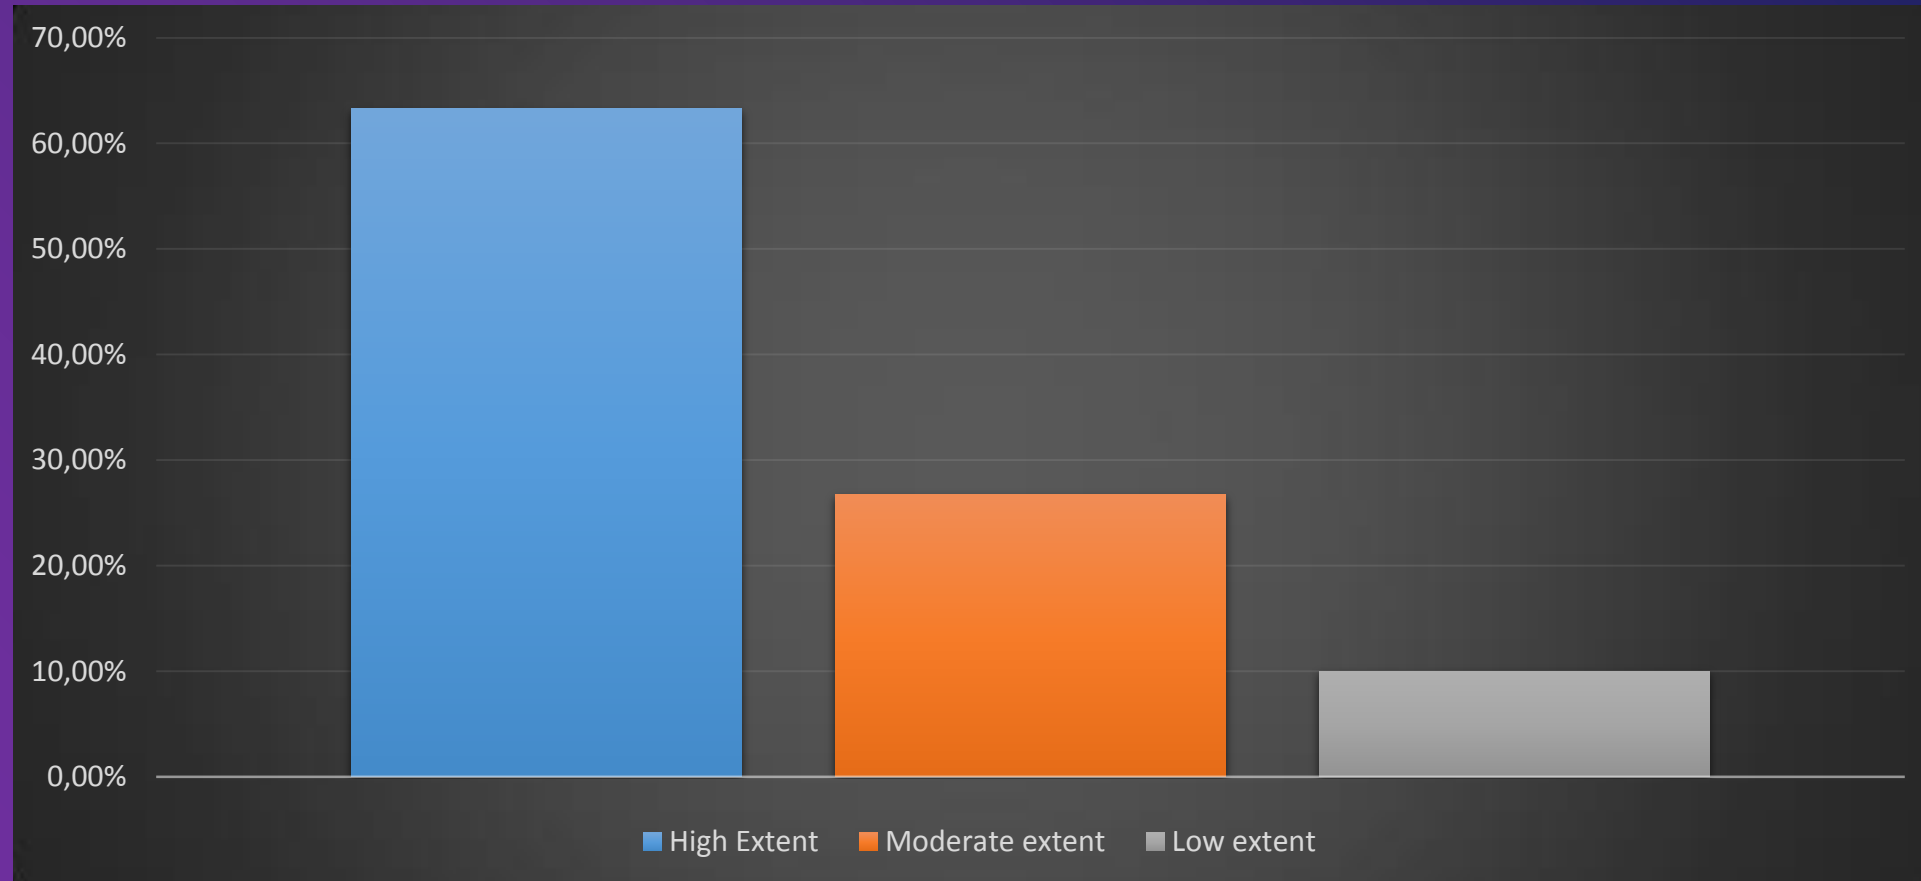

Books

*Pupils from Kaaga school for the hearing  
Impaired reading a stories from E-readers*

# Extent to which users benefit from digital information as compared to conventional methods

# Challenges Faced when accessing Information using ICT Tools

## Key

- Lack of Digital skills
- Inadequate Devices/equipment
- Slow internet
- Inadequate space

# Recommendation

- Librarians to undergo regular training in Digital skills/communication skills for the special needs.
- Access to information through digital platform for children with special needs and young adults should be enhanced through more outreach programs (special needs schools)
- Libraries should lobby the government and partners to increase funding toward technological innovation to invest in more devices and faster internet connection.
- Create an international network to promote inclusive library services for special needs children & young Adults

# CREATING AWARENESS ON SPECIAL NEEDS CHILDREN ON 4<sup>TH</sup> AUGUST 2018

# CONCLUSION

it is important to note that special needs children are not less intelligent than their “normal” counterparts and educators and librarians must devise measures to assist them to receive information, process it and express what they have learnt and understood.

THANK  
YOU
