TRAINING

- The "Security Committee" of the National Library has organized courses in risk prevention, such as "Psychology of emergencies", "Risk prevention", "Security and Emergency Preventive conservation workshops organized by the Conservation department of the National Library of Chile.
- Dissemination of information relating to conservation in the network of institutions receiving IPN
- Procedures for recovery documentary heritage and the Blue shield in "Preventive conservation Documentary Heritage . Emergencies ; organized by Agencia española de Cooperación Internacional para el Desarrollo, Santiago, October, 2013
- Preventive conservation workshops organized by the Conservation department of the National Library of Chile for librarians of museums

- Workshops organized by Illicit traffic work group, Chile-Perú. Identification and legal framework of cultural heritage, Tacna, July, 2013
- Guidelines for recognizing cultural heritage for Customs officers, Los Andes, April, 2014

PUBLICATIONS

- The "International Preservation News" has been distributed to 40 institutions (libraries, archives and museums) of Argentina, Peru, Ecuador and Chile
- **Suggestions:**
- To communicate in advance the subject of future publications to promote and encourage article writing among our members.
- Increase communication between the members.

Comment:

It has been difficult to interact with people within the local network of IFLA PAC, there are no answers to the written communications, most members only receive the magazine.

Maybe would be better results if each country is responsible for its own national network and create working relationships between them.
